Graphic & Media Designer Application

Dear **Fitness Blender Team**,

I am writing to express my interest in the Graphic & Media Designer position. With over 20 years of experience as a Brand & Product Designer, I specialize in creating clean, scalable visual systems that balance high-end aesthetics with functional user experiences.

While I am not a daily user of your workouts, I have long respected Fitness Blender's transparent, no-gimmicks ethos and how you maintain a highly structured, user-friendly content platform. My background includes design execution for medical marketing, dermatology, and medical aesthetics clients, which has given me a sharp eye for the exact visual codes your audience values: cleanliness, absolute clarity, and high-trust layouts.

Here is how my technical background aligns with your needs:

Figma & Adobe Expert

I use Figma and Adobe CC daily to build organized template systems and component libraries that ensure flawless visual consistency across channels.

Copyediting & Brand Alignment

Having worked as a Creative Director and running my own studio, I ensure that all marketing assets strictly respect grammar, tone, and brand style rules.

AI-Assisted Efficiency

I actively integrate GenAI tools into my workflow (LLMs and Diffusion Models) for rapid asset generation, data processing, and workflow automation, allowing me to deliver high-quality outputs efficiently.

While promotional video is not my primary specialization, I have basic editing skills and am currently leveraging LLMs to accelerate my motion graphics learning curve, ensuring I can prototype and adapt static assets for video seamlessly.

I look forward to the possibility of discussing how my design systems background can support Fitness Blender's growth.

Best regards,
Diego Fabbri Arpón
